### Appendix 8.1 JBI Mixed Methods Data Extraction Form following a Convergent Integrated Approach

**Note:** This form should only be used for reviews that follow a convergent integrated approach, i.e. integration of qualitative data and ‘qualitized’ data following data transformation. For reviews that follow a convergent segregated approach, reviewers should use separate data extraction forms: the JBI quantitative data extraction tool and the JBI qualitative data extraction tool.

**Type of study**

- [ ] Quantitative study
- [ ] Qualitative study
- [ ] Mixed methods study

**Methodology:** (e.g. randomized controlled trial, phenomenology)

**Number of participants:**

**Characteristics of participants**

**Phenomena of interest**

**Setting and other context-related information** (e.g. cultural, geographical)

**Outcomes or findings of significance to the review objectives**

For a quantitative study, for example

**Results**
- 29% of survey participants reported feeling embarrassed having an asthma attack with friends; only 39% disclosed their asthma to friends

- 32% were embarrassed about taking asthma medication in front of friends; only 38% reported taking asthma pump when going out

Reference: (Cohen et al., 2003)

For a qualitative study, for example:
